Blind-spot Collision-avoidance Assist (BCA)*
Monitors your blind spot while driving, and if another vehicle is detected, an LED on the side mirror will alert you. If there is a risk of collision with a vehicle on the side at low speeds (0-3 km/h), the system automatically assists with emergency braking.

*Fitur berfungsi sebagai sistem pendukung. Pengemudi harus tetap fokus dan berhati-hati selama berkendara.
*Trim N Line & trim Prime.
** Trim N Line.

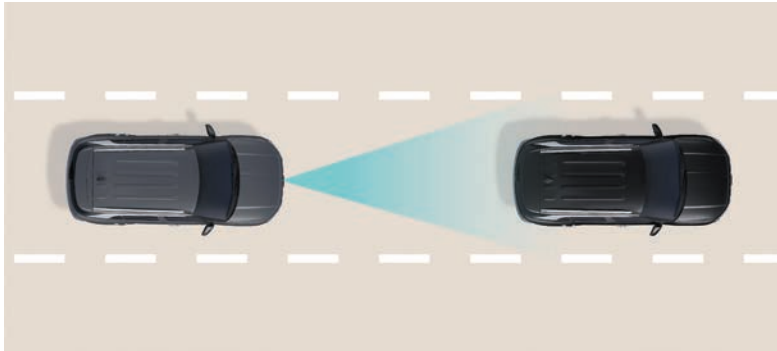

Blind-spot View Monitor (BVM)**
Activating the left or right turn signal will enable the Blind-spot View Monitor (BVM), which monitors blind spots and projects real-time visuals onto the meter cluster display.

Forward Collision-avoidance Assist with Junction Turning (FCA-JT)*
This feature alerts the driver when the system detects a risk of collision from the front or while making a right turn, such as with pedestrians or vehicles that suddenly slow down or stop.

Rear Cross-traffic Collision-avoidance Assist (RCCA)*
Notifies you of approaching vehicles from behind while reversing and automatically applies emergency braking if needed.

Smart Cruise Control (SCC) with Stop & Go*
Automatically controls the vehicle's speed without the need to press the accelerator pedal while adjusting the distance to the vehicle ahead. If the vehicle in front stops, SCC will automatically reduce speed until a complete stop and will resume driving when the vehicle ahead moves forward.

Surround View Monitor (SVM)**
The driver can get a 360-degree view of the surroundings when this feature is active.
